The Russian Maritime Register of Shipping has noted the contents of the EU Council press release of October 6th, in which the Russian Maritime Register of Shipping is mentioned.

“According to the press release, the package agreed today comprises, inter alia, “the insertion in the list of state-owned entities that are subject to the transaction ban of the Russian Maritime Shipping Register, a 100% State- owned entity which performs activities related to the classification and inspection, including in the field of security, of Russian and non-Russian ships and crafts”.

However, the Register observed that the relevant official legal acts had not yet been published by European Council. The Russian Maritime Register’s position on the sanctions would therefore be released later.
